

Wave Forecasting

Water region

Mean wind direction	22.000°
Wind sector	160.000°
Wind velocity	60.000 Km/hr
Average water depth	100.000 m

Wave spectrum type	JONSWAP
Significant wave computation method	Wilson's method
Method implementing directional effects	Seymour's method

Wave spectrum

Predicted Waves

Significant wave frequency	$f_s = 0.133$ Hz
Significant wave period	$T_s = 7.51$ sec
Significant wave Height	$H_s = 2.85$ m
	$H_{1/3} = 2.85$ m
Mean of heighest 1/10 waves	$H_{1/10} = 3.62$ m
Maximum wave height	$H_{max} = 4.56$ m

Wavetime series

Example 2
